

1 In 2007, Yangon, Nairobi, Singapore, Hong Kong, Mexico City, and Seoul were selected for a thorough review of traffic conditions concerning remaining issues, including Designated and Congestion.

2 The review will be selected after a thorough review of traffic conditions concerning remaining issues, including Designated and Congestion.

MUMBAI CITY DEVELOPMENT PLAN 2006-2020

STRATEGY FOR TRANSPORTATION

For mass participation in Mumbai, a focus on second hand travel between places of origin and arrival, development of Greater Mumbai and its vicinity of land has resulted in a month of on-line terms of Home, Kalyan-Dombivli, Navi Mumbai, and beyond.

Johannesburg Integrated Transport Plan 2

World class African city

Urban Transport Policy and Planning Documents

An overview on urban transport plans and strategies from all continents

For Transportation Researchers, Transport Policy Makers and Decision Makers

Some of its Major Goals are:

- Cutting city traffic fatalities by 50% from 2007 levels.
- Implementing bus rapid transit lines and measures to improve bus speeds city-wide.
- Doubling bicycle commuting by 2015.
- Initiating city-wide parking policies to manage curb space to reduce cruising and congestion.
- Adopting complete-street design templates for reconstruction projects.

Other goals include:
 • Delivering better street surface
 • better management of street c
 • sub-surface infrastructure wor
 • Maximizing energy efficiency th
 • our street lighting and office of
 • Retaining and attracting the be
 • transportation engineers, plann
 • managers.

Urban Transport Policy and Planning Documents

For Transportation Researchers, Transport Policy Makers and Decision Makers

GIZ – Sustainable Urban Transport Project (SUTP)

Based on more than 25 years of practical experiences, GIZ hosts the “Sustainable Transport: A Sourcebook for Policy-Makers in Developing Cities” (www.sutp.org) with a wealth of information and knowledge on appropriate solutions, inter alia on tackling climate change in the transport sector. Through training and advisory services, decision makers in the transport sector are better informed about transport emissions and their impact on our climate. This may, for example, lead to improved urban transport systems, less traffic and better alternatives to using cars or motorized two-wheelers, which are responsible for the lion share of transport fuel emissions. A win-win-situation on the local and global levels, as transport operators and users may save on fuel and in turn reduce emissions. In a nutshell: Smarter mobility means more fresh air for people and less GHG pressure on our climate.

The flagship publication “Sustainable Transport: a Sourcebook for policy-makers in Developing Cities” compiles most international practices and provides access to numerous other resources. Materials are complemented by training courses targeted to policymakers, planners or engineers in cities, regional entities and on governmental level.
